Bike-Lift

Sollevatore Elettrico Verticale
Vertical Electric Lift

LEB 50

PATENT PENDING

LEB-50 Power Lift Shop Stand is evidence of how simple construction leads to a quality product that is functional, reliable and affordable for mechanics and avid cyclists alike. The electric motor allows the LEB-50 to become operative in short time, without the need for additional equipment or tools The design of this lift has been developed keeping well in mind all the performance requirements needed for work to be done in total comfort and safety, even with the heavier E-Bikes.

Our thirty years' experience in the motorcycle lifting sector has helped us identify all the requirements needed by a bike technician and mechanic to service bikes in the most effective, comfortable and safest way possible. For example, the ergonomic design of the clamp that rotates 360 degrees and the 198 cm height allowance makes for easier access to every part of the bike frame, resulting in the best positioning of the bike and ultimately better and quicker service. The 80 kg/176 lbs. structure makes it a robust and versatile partner in every shop. The motor has been tested for 50.000 cycles with a max weight of 50 kg/110 lbs.

Scheda Tecnica
Technical Sheet

• Capacità Massima	50 kg
Max. Capacity	110 lbs
• Altezza Massima	198 cm
Max. Height	6,5 ft
• Altezza Minima	88 cm
Min. Height	2,8 ft
• Peso	80 kg
Weight	177 lbs
• Alimentazione	220/110V DC
Power Supply	220/110V DC
• Dimensioni	230x70x80 cm
Dimensions	7.5x2.3x2.6 ft

LEB 50 *twin service*

PATENT PENDING

Il LEB-50 può essere anche utilizzato nella versione TWIN SERVICE, che offre la possibilità di avere due postazioni di lavoro anche in uno spazio limitato. La piastra di base ha una lunghezza di 120cm quindi è facilmente posizionabile anche in una piccola officina. I sollevatori si possono posizionare su lati opposti in due diverse soluzioni, mantenendo lo stesso ingombro ma fornendo agibilità operative diverse fra loro.

The LEB-50 is also available in a TWIN SERVICE version, that offers the possibility to have 2 servicinig bays even if in limited working area.The base plate has a lenght of 120cm so can be easily positioned even into a small workshop. The lifts can be ordered with 2 different positionings, keeping the same overall dimensions but offering a different working access and space.
